Yesterday was a clean-up day. We were asked to clean the park. We were also asked to collect and sort the rubbish there. We took the school bus and arrived there at ten in the morning. The clean-up started at 10:30 am and finished in the afternoon. The waste paper we collected was as much as a quarter of the total rubbish, and we got about five hundred plastic bottles. We sold the waste paper and plastic bottles. We also sort batteries and lunch boxes and so on. We were all tired but we felt very happy.

C)请听下面一段独白。

What can we do to save the earth? Here are some tips on saving the earth.

First, if you have some old things and you don't want them anymore, have a party with your friends and share these things with them. If you act this way, you won't waste them and will get something new and useful to you. Second, ask your mother to buy a reusable sandwich box for you. It can be washed and used as your lunch box. Third, plan your birthday party in a green way. For example, you can send online invitations and serve home-made food. Advise your friends to ride a bike or walk to your party.

Let's build a green city together

As middle school students of Nanchang, it's our duty to help build a green city. We can avoid the traffic jams and reduce the air pollution by riding bikes or walking. We mustn't throw rubbish or spit anywhere. In this way, we can keep our city clean and tidy so that we can live a comfortable life. And we'd better plant more trees to protect the environment and make our city beautiful.

In my daily life, I can pick up rubbish and put it into the dustbin wherever I go. I can also save the energy by turning off the lights when leaving the room. In a word, everyone can play a part in building our city.
